

It was a gloomy day in the ZOMZ agency lab. Right now you are probably thinking, “What is the ZOMZ agency lab?” The ZOMZ agency lab is a lab that my friends and I created. We mostly solve crime mysteries and catch the crooks. ZOMZ stands for our initials Zakariya (Zakariya is my name), Ohmed, Muneer, and Zayd. The lab is located underground in Ann Arbor, Michigan. To reach our hidden lab, we use a secret, subterranean elevator.

On this particular day, the ZOMZ crew was in the lab searching computer databases for a man named Loki. The villain Loki wanted the whole world to obey whatever he dictated. Loki was a mean and powerful man. He enjoyed killing people, even innocent people, to further his own evil designs. The ZOMZ crew had to stop him.

In the lab, we were investigating Loki’s weaknesses, but, unfortunately, it appeared that Loki had no weaknesses. His only problem was that he had no backup.

We got out of the lab and went through our secret elevator that screeches so much. But as we exited the elevator, BAM!, Loki hit us with his powerful punch. We were knocked out. Next thing we knew, we were in New York City.

While we were in New York, Loki continued with his plan. He planned to establish himself in Washington D.C., and then become president. His next planned to rule the world. Once Loki went to Washington D.C., he became president. He said “America, bow before me.” Nobody in America would bow to him, so he started torturing the people in America.

However, back in New York, hope was lost for the ZOMZ agency (or so we thought). Ohmed noticed that Loki forgot to lock the cell door. The crew and I hastily left the cell and

boarded an airplane to Michigan. In Ann Arbor we quickly went to our lair. We located where Loki was. He was in Washington D.C. We took the first plane available to Washington D.C.

In Washington D.C., people were crying and running. They were all scared. Loki was torturing anyone he saw. He used his mean powers. He was torturing poor people, infants, and hobos. We developed a distraction plan. Ohmed was going to try to fight Loki while Muneer and Zayd jumped him from the other side. If Ohmed needed help, I would help him.

We activated our plan. Ohmed attacked Loki. He was surprised, so Muneer and Zayd went behind Loki. They didn't attack him, though. First they wanted to see if Loki would die if they shot him with an arrow.

The result was that he didn't die. Loki turned around and attacked Muneer and Zayd. Right when he was going to hit them, I came up behind him and kicked him hard—a solid punch to the kidneys. Ohmed jumped on him. Loki threw Ohmed off, but he didn't get hurt. Loki got up to attack but he was too slow. He was getting less powerful.

Zayd and Muneer were getting ready to jump on Loki. Once Zayd and Muneer jumped Loki he got so mad he got up but he noticed he couldn't go anywhere because Ohmed, Zayd, Muneer and I surrounded him. This time we all jumped him and Ohmed handcuffed him. We took him to Guantanamo Bay and put him in jail.

Life was back to normal in the ZOMZ agency. The ZOMZ agency was back in Michigan where people were walking outdoors on the sidewalk and people were bike riding and life was back to normal in America.
